Question: I am the owner/ operator of a business that maintains Anhydrous Ammonia (AA) at or above the Chemical Facility Anti-Terrorism Standards (CFATS) Screening Threshold Quantity (STQ) for BOTH the treatment of crops and for use as a refrigerant in a cold storage facility. Is my facility eligible to claim the CFATS Agricultural Production Facility (APF) Top-Screen extension?

Answer: If your facility maintains COI at or above the STQ for use as a refrigerant, that particular use of the COI is **not** eligible for the APF Top-Screen extension. However, the portion of COI that your facility uses for treatment of crops would be eligible for the APF Top-Screen extension. Therefore, your Top-Screen would need to include only the COI at or above the STQ that is **not used for the treatment of crops.**
